## Environmental Policy

SYNCRO Corporation is committed to protect the environment, prevent pollution and comply with applicable legal requirements through our established EMS. Our production processes will consider limited resources and minimize the impact we can have on the environment. SYNCRO will determine environmental aspects in order to set our objectives and targets for continual improvement of our environmental performance. This policy will be reviewed annually and the objective and targets revised as conditions change and relevant information becomes available. SYNCRO will communicate this policy all employees, contractors, customers & local residents while making it available to any interested parties.
